

Curriculum for Associate Degree Program in CNC Machining Technology Specialization

The curriculum of associate degree in **"CNC Machining Technology"** specialization consists of (72 credit hours) as follows:

Serial No.	Requirements	Credit Hours
First	University Requirements	12
Second	Engineering Program Requirements	17
Third	Specialization Requirements	43
	Total	72

تطبق هذه الخطة الدراسية اعتباراً من بداية العام الجامعي 2009/2008

Al-Balqa' Applied University

جامعة البلغاء التطبيقية

The curriculum of associate degree in CNC Machining Technology

First: University requirements (12 credit hours) as follows:

Course No.	Course Title	Credit	Weekly Con	tact Hours	Droroquisito
Course no.	Course The	Hours	Theoretical	Practical	Prerequisite
22001101	Arabic Language	3	3	-	
22002101	English Language	3	3	-	
21901100	Islamic Culture	3	3	-	
21702101	Computer Skills	3	1	4	
	Total	12	10	4	

Second: Engineering program requirements (17 credit hours) as follow:

Course	Course Title	Credit	Weekly Cont	tact Hours	Prerequisite
No	Course Thie	Hours	Theoretical	Practical	1 lei equisite
20201111	Engineering Workshops	1	-	3	-
20204111	AutoCAD	2	-	6	-
20506111	Occupational Safety	2	2	-	-
21301111	General Mathematics	3	2	2	-
21302111	General Physics	3	2	2	-
21302112	General Physics Laboratory	1	-	3	21302111*
21702111	Communication Skills and Technical Writing	3	2	2	22002101
20201121	Engineering Materials	2	2	-	-
	Total	17	10	18	

* Co-requisite

تطبق هذه الخطة الدراسية اعتباراً من بداية العام الجامعي 2009/2008

Third: Specialization Requirements (43 credit hours) as follows:

Course	Course Title	Credit	Weekly Cont	tact Hours	Dronoquisito
No.	Course Thie	Hours	Theoretical	Practical	- Prerequisite
20212111	Mechanical Drafting	2	-	6	20204111
20212121	Mechanical Measurements	2	2	-	
20212122	Mechanical Measurements Lab.	1	-	3	20212121*
20301111	Electricity and Electronics	2	2	-	21302111
20301112	Electricity and Electronics Lab.	1	-	3	20301111*
20212231	Manufacturing Processes	2	2	-	
20212232	Manufacturing Processes Workshop	1	-	3	20212231*
20212241	Nontraditional Machining	3	1	6	
20212141	Metals Machining Technology	2	2	-	
20212151	Computer-Aided Design and	2		6	20204111
	Programming	2	-	0	
20212251	Computer-Aided Manufacturing	3	3	-	20212151*
20212142	Turning and Milling Workshops	2	-	6	
20212152	CNC Machines Workshop	2	-	6	
20212261	Molds Design and Manufacturing	2	2	-	
20212262	Molds Design and Manufacturing	2	_	6	20212261*
	Workshop	-		~	
20212252	Advanced Applications of CNC	3	1	6	20212152
	Machines	-	-	č	
20212221	Materials Testing	2	2	-	
20212222	Materials Testing Lab.	1	-	3	20212221*
20409111	Industrial Supervision	2	2	-	20506111
20212291	Training**	3	0	-	-
20212292	Project	3	0	-	-
	Total	43	19	54	

*-Co-requisite

** Equivalent to 280 training hours

An introduction to computing and the broad field of information technology is given. Topics covered include the basic structure of digital computer system, microcomputer, operating systems, application software, data communication and networks, and the internet. Hands-on learning emphasizes Windows xp, MS-office2000, and the internet.

*

ngineering Program requirements		
Engineering Workshops	20201111	1 (0-3)
Development of basic manual skills in		
measuring devices. Hand filing, weld		
AutoCAD	20204111	2 (0-6)
Introduction to AutoCAD, application construction. Dimensioning, free –han and projections.		
Occupational Safety	20506111	2 (2-0)
Role of technicians in economic dev and equipment. Industrial safety s Physiological effects of electrical sho electric shock. Rules of spare and che	tandards. Nature of fire haz ock on human body. First aid a	ards. Sand fire regulations.
Communication Skills and Technical Writing	21702111	3 (2-2)
The main goal of this course is to eq everyday life & work situations and needs. For this course, the English communication for all classroom situa	improve their abilities in tech language is the language c ations.	nnical writing to meet market of teaching & the means of
Engineering Materials	20201121	2 (2-0)
Definition of engineering materials. (non-metallic materials. Metals, allo semiconductors. Mechanical, Magn Industrial applications of different typ	bys and composite materials. etic, Thermal and electrical	Conductors, insulators and
General Mathematics	21301111	3 (2-2)
Real numbers coordinate planes, line functions), limits, continuity, limits logarithmic functions. Differentiati differentiation). Application of dif polynomials. Applications: Rolls substitution, definite integral, fundam (area between two curves, volumes)	and continuity of trigonometri on (techniques of different fferentiation (increase, decre Theorem and Mean-Value hental theorem of Calculus). A	ns: (operations and graphs on c functions. Exponential and iation, chain rule, implicit ase, concavity). Graphs of Theorem, Integration (by
General Physics	21302111	3 (2-2)
The physical concepts to be studied two dimensions, the laws of mo- energy and energy transfer, pote potential, capacitance, current and	tion, applications of Newto ntial energy, linear momen	on's laws, circular motion,

*

1 (0-3)

Manufacturing and Layout20212232Processes Workshop

Practical applications of the following processes: forging, drawing, extrusion, rolling. Sand casting and molding processes. Applications of different kinds of metal cutting. Safety measures. Using measuring devices and tools.

Nontraditional Machining202122413 (1-6)Introduction to advanced manufacturing machines, EDM, EDB, ECM, WCM, USM where is no
Sharpe tools needed, classification, specification, components and process diagram, operation of
those machines, electrodes .

Metals Machining Technology

Introduction to cutting and machining, holding devices, lubricants and cutting fluids, sawing operation and power sawing (hacksaws, band saws), drilling, milling machines, drilling operation, lathe and lathe operation, lathe cutting tools, cutting parameters, milling machines and milling operations, cutting parameters, workpiece holding devices and accessories, shaping, planning, and broaching, precision grinding.

20212141

20212151

Computer-aided Design and Programming

Introduction to numerical control NC and CNC systems. Structure of NC and CNC systems, applications of NC systems, types of NC systems, NC part programming. Programming languages. G-M-Codes and functions. Key issues of NC programming. Programming modes, tool path, units, tool programming, zero set. Compensations, machine setup. NC part program introducing. Interpolation. Program test (simulation mode) and machining mode.

Computer-Aided	20212251	2 (2 0)
Manufacturing	20212231	3 (3-0)

Introduction to production and manufacturing systems. Metal removal processes. Metal removal machine tools. Machining parameters. Basic relationships and calculations. NC and CNC machine tools. Structure, types and specifications. Control resolution, accuracy and repeatability of positioning systems. Process planning. NC part programming. Instruction coding, ISO coding system. Examples of part programming.

Turning and Milling	20212142	2 (0-6)
Workshop		

Introduction to conventional machining operations: turning, milling, shaping, grinding. Cutting tools: drills, turning tools, milling tools, shaping tools and sharpening tools. Workpiece fixing. Grinding wheels. Examples of machining operations.

2 (2-0)

2(0-6)

جامعة البلقاء التطريقية

CNC Machines Workshop 20212152 2 (0-6) Setup and operating NC machine tools and machining centers. Cutting tools installing. Programming straight lines and curves. Programming simple machining operations. Installing NC

part programs. Single and cycle programming. Program testing and execution. Examples.

Molds Design and	20212261	2 (2-0)
Manufacturing		

Introduction to mold design. Metal forming processes. Classification of iron alloys used for molds. Working characteristics at a given mass and shape of parts. Detailed design. Molding process and materials. Allowances and tolerance. Design of shearing and bending dies. Design of cores and complex shapes.

Molds Design and	20212262	2 (0-6)
Manufacturing Workshop		

Hand forging processes. Sheet metal work. Rolling, bending and drawing. Metal arc welding, oxy-acetylene welding, brazened, soldering and metal cutting. MIG and TIG welding. Equipment and operations. Examples.

Advanced Applications of CNC Machines

Operator monitor, dwell time, subroutine call, polygon programming, tool path correction, face turning, redrawing cycle, threading, industrial machine registry, peripheral instrument programming, PC design tutorial and NC programming, creating 2D geometry, tool path contour, chamfer, roughing and finishing passes, rotating geometry and tool path, creating drill tool paths, working in 3D geometry, facing and pocketing, creating multi-axes tool path, machining solids.

20212252

Materials Testing	20212221	2 (2-0)
-------------------	----------	---------

Principles of statics including equilibrium and static equivalence. Determination of moment and force resultants in slender members. Introduction to mechanics of deformable bodies: concepts of stress and strain, classification of materials behavior, stress-strain relations and generalized Hook's law. Applications to engineering problems involving members under axial load, torsion of circular rods and tubes, bending and shear stresses in beams, combined stresses in beams, combined stresses, deflection of beams, buckling of columns. Methods of materials testing. Equipment and procedures of testing. Standards and references.

Materials Testing Lab. 20212222 1 (0-3) Structural analysis of materials. Photo-electrical and thermo-electrical effects analysis. Chemical, mechanical and electrical properties of materials, strength, tensile and impact testing, hardness testing, tests for detecting cracks and flaws, ultrasonic inspection.

3 (1-6)

Industrial Supervision204091112 (2-0)Supervising duties, training knowledge, introduction, job standards, job analysis, training needs
study, training programs and curriculum, training evaluation, subordinates appraisal, job
organization, production orders forms filling.

Training	20204291	3 (280 training hours)		
Equivalent to (280 hours) of field training targeted to emphasize the ability of students to apply the theories in the real world of the profession.				
Project	20204292	3		

An integrated assembly/design practical work related to the major fields of study.
