

Engineering Program

Specialization	Production and Computer Aided Manufacturing Technology
Course Number	• 2 • 2 • 2 2 2 1
Course Title	Production Workshop
Credit Hours	(3)
Theoretical Hours	(1)
Practical Hours	(6)

Brief Course Description:

An integrated assembly/design practical whole work using machines and technologies studied in previous courses including fabrication and assembly.

Course Objectives:

At the end of this course student will be able to practice the studied subjects in an effective practical project designed and manufactured in the workshops
